Kansas City Accident Injury Attorneys Welcomes a Parade of Hearts Sculpture into Their Offices

Kansas City Accident Injury Attorneys is proud to announce that the law firm is the new home of a Parade of Hearts heart sculpture. The sculpture by Aaron Ross was created as part of the Parade of Hearts project, which aimed to raise funds for those affected by the hardships of 2020 and 2021. The event raised \$2.56 million, and the sculpture is on display in Kansas City Accident Injury Attorneys' offices indefinitely as a reminder of the community's strength.

The Parade of Hearts is a public arts experience that was created to raise funds and awareness for those affected by the hardships of 2020 and 2021. In the spring of 2022, the city placed one hundred and fifty-six 5ft x 5ft heart sculptures, each featuring a local artist's design. Each heart design is meant to highlight aspects of Kansas City, from local sports teams to the city's beauty.

The individual hearts sold in a silent auction. The money raised from the auctions went to help those affected by the traumatic events of 2020 and 2021. These sculptures are a reminder that despite the hardships that have been faced, our community is still strong. The project is an example of how we can come together to help those who need it most while celebrating our beloved home.

Kansas City Accident Injury Attorneys is proud to be the new home of the 138th heart sculpture, "The Phoenix Takes Down the Sun for Another Night," by local artist

Aaron Ross. The face of the heart shows the Kansas City skyline and the sunrise, representing the rising of a new day. The back of the heart is the Phoenix taking down the sun for another night. The colors in the design were chosen from Kansas City sports teams, the Chiefs, Royals, Sporting KC, and Comets.

The law firm welcomes anyone who wishes to visit this heart! Contact us at www.kansascityaccidentinjuryattorneys.com

THE HEART BELONGS
TO THE BLACK WOMAN
